

One Series Lunar Phaser

Product # SA241

Lunar Phaser Product Description:

The Lunar Phaser offers three styles of swirling stereo phase modulation. Choose from Vibe - a thumping Uni-Vibe effect, Classic - a resonant and creamy 4-stage phaser, and Multi - a highly animated, yet smooth and satisfying 8-stage phaser. Explore the sonic landscape even further by sweeping the Shape knob to gradually morph the LFO wave shape from a smooth, undulating sine wave to an aggressive and choppy square wave.

Out of the box, the Lunar Phaser provides tremendous tonal range, but under the hood this pedal is a powerhouse of control and flexibility. Every stompbox in the One Series line is compatible with the Neuro Mobile App (a free download for iOS and (coming soon) Android). The App offers an extensive list of additional phaser, flanger, and chorus algorithms - each can be downloaded directly to your Lunar Phaser. The Neuro App also features an extended set of adjustable parameters including the Frequency (the center point of the modulation), Output Level, embeddable Tremolo, Low Retain, a Parametric EQ, Advanced Signal Routing and more. Plus, every One Series pedal is fully MIDI compatible when coupled with the Neuro Hub (formerly Soundblox Hub), giving you the power to save up to 128 presets.
