

Manta Demo Settings

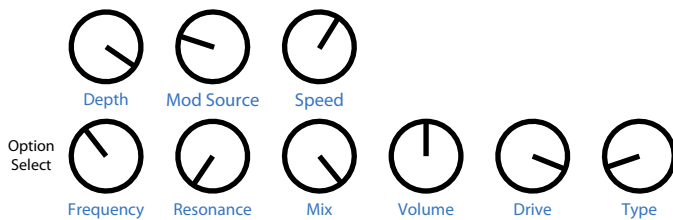

Below we've created some templates for dialing in some of our favorite sounds in the Soundblox 2 MANTA Bass Filter. These settings are for the knob positions on the pedal, including the various parameters controlled by the OPTION knob, when selected. Click the OPTION SELECT button to scroll through these selections and control their corresponding levels by turning the OPTION knob for each.

Given the number of adjustable parameters in the MANTA, it can be useful to "zero-out" the OPTION SELECT parameters. To do this, hold the OPTION SELECT button for 3 seconds, until its three LEDs blink twice.

Have fun playing with these settings, and please share with us your favorite settings too!

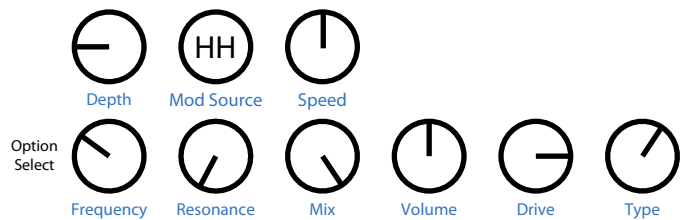

Sine LFO Wobbles - Filter #6

Time for some auto-wobble action!
Adjust the speed knob to change the rhythm, or try it with Tap Tempo control.

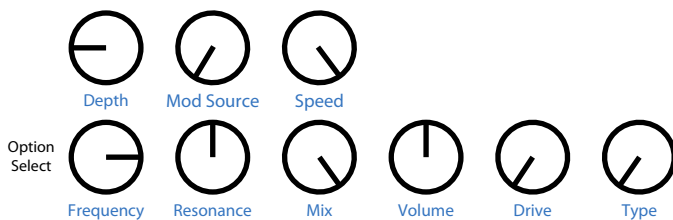

Hot Hand Wobbles - Filter #6

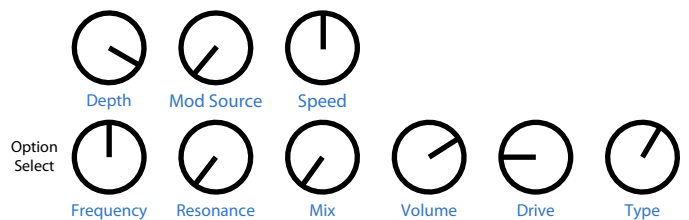

Use this setting if you own the Hot Hand ring controller and like organic bass wobbles. Wave it like you just don't care.

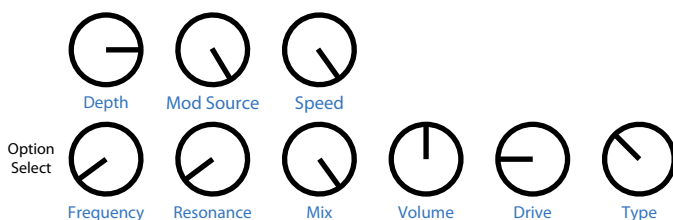

Funky Clean - Filter #1

Funky Clav. - Filter #9

Chameleon - Filter #5

Groove Is In The Heart - Filter #10
